DRIVEN TO OUTPERFORM®

STEERABLE AUXILIARY SUSPENSION

The family of steerable auxiliary suspensions enhance the installation, performance and uptime of commercial vocational vehicles. Featuring Swift Mount brackets, Link's steerable auxiliary suspensions use patented interchangeable ride height brackets to save you up to 3-5 hours of installation time.

Four sets of interchangeable brackets can be used to mount any current steerable Link auxiliary suspension. Link's steerable lift axles are available in 8K, 10K, 13.5K (drum or disc brake option), and 20K capacities.

The integrated air kit system saves on valuable frame rail space and installation time. The bulkhead air kit uses push-to-connect fittings which centralizes multiple air outlets into one location. The air tank is stored behind the cross member for clearance and protection.

Engineered to Link's exact standards for reliability and durability, all steerable auxiliary suspensions are equipped with cast lift arms and Link-KOAT® - a self-healing metal treatment to provide corrosion resistance and rust protection.

SWIFT MOUNT BRACKETS

Swift mount brackets reduce installation time by up to 20%; install any Link lift axle with 4 sets of brackets.

SWIFT ALIGNMENT TECHNOLOGY

Flush alignment edges on main mounting brackets serve as a visual aid to simplify the installation process.

FENDER BRACKET ATTACHMENTS

Optional fender brackets don't require hub removal and allow optional reverse lock.

DISC OR DRUM BRAKE OPTION ON 13.5K

We've simplified maintenance and inventory requirements utilizing standard wheel end and brake components.

RUGGED CAST LIFT ARMS

The cast lift arms improve lift, reduce wear on bushings and minimizes interference issues for certain applications.

RIDE SHOCK ATTACHMENT OPTION

Improve the overall durability and reduce axle bounce with optional ride shocks.

BULKHEAD AIR KIT FITTINGS

The bulkhead air kit reduces overall installation time with push-to-connect fittings and centralizes multiple air outlets.

COMPACT MOUNTING ENVELOPE

Save on valuable frame rail space with an industry competitive mounting envelope of 22".

Note: All the weights are for the base suspension with hubs and drums, but does not include frame bracket kits, air kits, wheels, or tires. The envelope is the measurement from the center of the spindle to the front edge of the front frame bracket with the suspension at the middle of the ride height.

NON-STEERABLE AUXILIARY SUSPENSION

Link's family of non-steerable auxiliary suspension provides distinct advantages in convenience and performance. Fast shipping, quick installation and responsive customer support, combined with the reliability and durability Link is known for, results in a lower overall cost of ownership.

The 20K non-steerable auxiliary suspension has proven its reliability for both on and off-highway applications. The suspension incorporates interchangeable ride height brackets to accommodate a wide range of ride heights for nearly any truck. The suspension has tag and pusher position options available. The pre-plumbed integrated air kit combined with the compact mounting envelope saves on valuable frame rail space and installation time.

The unique design of the model 5500 allows 11" to 15" of ride height and 15" of travel for applications encountering uneven terrain. The direct arm to axle connection increases stability and reduces maintenance. The suspension is available with 15" or 20" wheels for maximum lift and clearance.

SWIFT MOUNT BRACKETS

Swift mount brackets reduce installation time by up to 20%; install any Link lift axle with 4 sets of brackets.

PUSHER OR TAG POSITION

Four interchangeable ride height frame brackets allow 7" to 15" of ride height and 15" of travel.

77.5" STRAIGHT AXLE AVAILABLE

For specialty applications requiring a wider axle track (6" wider than standard track).

STRAIGHT OR DROP CENTER AXLES

For maximum lift and clearance, the 20K is available with 6" or 9" drop center axles; straight axles are also available.

STANDARD OR LONG STUD OPTION

Two stud lengths allow for steel and aluminum wheels (single or dual).

TRAILER MOUNTS AVAILABLE

Trailer mounts are available for 15" to 19.5" ride heights.

BULKHEAD AIR KIT FITTINGS

The bulkhead air kit allows for push-to-connect fittings and centralizes multiple air outlets.

COMPACT MOUNTING ENVELOPE

Save on valuable frame rail space with an industry competitive mounting envelope of 24.6".
