

SmartValve Electronic Height Control

Driver Evaluation Summary

Data Source

50 Fleet Drivers in US & Canada

Overall Assessment (1 - 10 Scale, 10 highest)

9.4

Prefer tractor with SmartValve.....	96%
Agree SV reduces risk of injuries and backaches.....	96%
Agree SV reduces effort in cranking landing gear.....	98%
Agree SV saves time in Drop-and-Hook.....	96%

Feedback

“From a fleet manager’s perspective I have seen a remarkable improvement in his (the driver’s) work ethic and attitude.”

“It has made my life easier and I would like to see this as a spec on all our tractors.”

“Every truck should have this!!!”

“Saves a lot of time lowering the trailer legs onto 5th wheel plate.”

“Great for ice drips/pick ups, tight docks where crank handle is inaccessible. All in all, great addition to truck!”

“The system works great and is a blessing when backing under trailers which have been dropped way too high.”

“I’ve used other systems of the years but this is the easiest and least complicated.”

“It eliminates wasted time hooking trailers.”

“Works great and makes my job safer, easier and more time efficient...”

“Love this! Truck suspension sits lower than a lot in fleet. Saves a lot of time cranking trailers lower to hook up!”

“A 10+. Life saver. Thanks.”

“The Link valve is fantastic. Not only for leveling purposes but also for raising suspension during hookup to take pressure off landing gears is a great feature. Outstanding find and addition to the tractors! The Link valve is a home run.”
